Whether you plan to use it long term or you want a deep test-drive before you use our Fidesic AP Pro version, Fidesic for Free offers robust features to help you reduce your time and costs associated with processing invoices.

Robust Workflow

You can route based on vendor, Entity, Location, GL, amount, or any other item contained on the invoice.

Mobile-Device Approval

Remote invoice approval can be done using any device. Approve invoices right out of outlook or any other email.

Industry Leading Data Capture

With the combination of OCR and Human Entry, you can rely on our system to ensure you receive the most accurate invoice data.

Multi-Location Support

Users can only see the invoices and GLs for their assigned entity.

Tight ERP Integration

You won't have to worry about data entry with Fidesic. Approved invoices in our portal are directly compatible with your ERP system.

Send ACH and Paper Checks

We'll help you out with approval and take care of fulfillment.
